During this spring's Alternative Weekend Break, students learned and worked with the Rolla Lion's Club Park. The group braved the cold rainy weather to help make the community space look a little nicer. One group got down and dirty in the mud pulling weeds for several hours, another group took trash bags and swept the park for stray trash.

On Saturday, April 14th, a group of 21 students and staff volunteered their morning at the Rolla park. The group worked on rocks. If you are interested please contact Kathie Cox at kathiecox51@yahoo.com or 417-699-3043. Another group helped clean up the surrounding area. Due to this year's theme being "LIBRARIES ROCK!" we would like to have someone from the S&T geology department come to present a program on rocks. If you like to have someone from the S&T geology department come to present a program on rocks, please contact Sherita Bradshaw at Sherita_Bradshaw@mst.edu or 417-693-9322.

We hosted 9 volunteer events open to students, staff, and faculty throughout the school year. Thank you to all that participated. If you have any questions you can contact Sierra Shields at sssz93@mst.edu or Jessica Haywood at Haywoodj@mst.edu.

Volunteer Opportunity for Current Students

We are heading into our 16th year of programming. Changing Lives year round activities in your region or our St. James summer of programming. Changing Lives. You can sign up as a volunteer for this event you can register at SVLIB@TENNESSEETOWN.LIB.MO.US or director@stjameschamber.net.

Volunteer Opportunity for Non-Current Students

Students learned the importance of giving back to the community. During this spring's Alternative Weekend Break, students learned and worked with the Rolla Lion's Club Park. The group braved the cold rainy weather to help make the community space look a little nicer. One group got down and dirty in the mud pulling weeds for several hours, another group took trash bags and swept the park for stray trash.
